-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3747

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Duren.

In particular, the applicant has identified prior art shown in Figure 3 as teaching an inlet valve including the claimed annular seats and a weight that covers the entire seal for the passageway.

Duren teaches the use of a weighted member that contacts the seals on a similar valve passageway only between the seats.

It would have been obvious to modify the admitted prior art by contacting the seal only between the seats as taught by Duren because the valve structure of Duren was nearly identical to that of the admitted prior art.

Claims 5-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 14-30 and 32-39 are allowed.

Applicant's arguments filed June 9, 2005 have been fully considered but they are not persuasive. In particular, the newly discovered prior art to Duren clearly shows the use of a weight between a pair of annular seals. The final rejection of 2/18/05 is hereby withdrawn due to the use of a new reference against the Claims.
